

CONSUMER BEHAVIOR RESEARCH

Understanding customers, shaping better strategies

01 RESEARCH OVERVIEW

This study examines how urban consumers aged 18 to 45 choose, compare and buy everyday products. It combines a 350-respondent survey with four focus groups held in two cities during March and April 2026.

02 OBJECTIVES

- ✓ Identify the factors that drive purchase decisions
- ✓ Measure price sensitivity across income groups
- ✓ Map the role of brand trust and online channels

03 TARGET AUDIENCE

Age range 18 – 45 years old
Gender All
Location Urban areas, 2 cities
Income level Middle to upper
Sample size 350 respondents

350 of 500 invited took part

04 RESEARCH METHODS

- Online survey**
350 respondents, 24 questions, March 2026
- Focus group discussion**
4 groups of 8 participants in Medan and Jakarta
- Data analysis**
Descriptive statistics and thematic coding

05 KEY FINDINGS

- Product quality is the top priority** 72% of respondents rank quality as the most important factor
- Price sensitivity matters** 68% compare prices before making a purchase
- Brand trust influences purchase** 65% choose brands they already trust
- Online shopping is growing** 60% prefer to shop online for convenience and promotions

06 CUSTOMER INSIGHTS

More than half of the respondents name quality and price together as their main reason to buy. Promotions matter for a quarter, mostly among younger buyers.

“ Consumers reward quality first and price second; promotions win only when both are equal. ”

07 MARKET TRENDS

- Rise of e-commerce**
Online purchases grew 18% year on year
- Mobile influence**
7 in 10 respondents research products on their phone first
- Sustainability matters**
38% pay more for products with less packaging

08 RECOMMENDATIONS

- ✓ **Focus on quality**
Keep quality visible on packaging and product pages
- ✓ **Competitive pricing**
Match the two largest competitors on core items
- ✓ **Strengthen brand trust**
Publish reviews and guarantees where customers compare
